

National Human Rights Consultation Submission

AGWW-7QMRF4

Organisation: Action Foundation Inc

Submission Text:

i will make other submissions but i will start with children's rights.

we here a lot about everybody's right but a society is judged by how it treats it's own children.

children have all the rights that anyone can talk to you about but the biggest right is the one most important in short parents. we have too many so called parents who simply do not know or are incapable to really look after their kids. and we have DOCS for that but i think that DOCS adds to the problem.

docs should recognise the fact that kids are better off at home with their families and should simply be given the power to firstly educate the parents in parenting etc.

Our society cannot afford to keep remoing chilldren from amilies (we could end up with a similar situation as the stolen generation all over again). put simply if the parents are not cooperative and are not willing to parent their children than the kids are simply removed but given to adoptive parents but before that huge step is taken DOCS must make absolutely sure that it has tried to educate the parents.

thanks

paul
