

# National Human Rights Consultation Submission

AGWW-7P52ZQ

**Name:** Giordano Nanni

**Submission Text:**

1. Australia needs a Human Rights Charter/Bill of Rights immediately (long overdue)
2. The NT intervention needs to be rolled back and replaced with a more inclusive and consultative process (which means the Racial Discrimination Act 1974 and the Anti-Discrimination Act (NT) which were suspended for the Intervention to go ahead, need to be fully reinstated)
3. The Australian government must immediately ratify the UN declaration on the Rights of Indigenous People (rather than obstructing the process)
4. the Australian government needs to lead by example and show the majority world a 'fair go' seeing that we come from the wealthy privileged minority and our luxuries often come at the cost of mass exploitation of others
5. Australian Mining companies operating overseas should be bound by a code of ethics for Human Rights.
