

National Human Rights Consultation Submission

AGWW-7PM23S

Organisation: NA

Submission Text:

We need to protect the religious organisations and give them the right to exist free from public scrutiny, for a dislike of another's religion is no right to attack it.

We need to defend artists and their product... for the internet has been a method of making copyrighted material available, for free, for too long...

The media needs to be far less biased to a single political and/or anti/pro-religious group. For what the public WANTS to hear is far from the truth.

Their right to twist facts, reorder facts, ignore facts, insist on including unnecessary facts... all to create a desired affect, is getting WAY out of hand... They have a responsibility to the public to be better.
