

National Human Rights Consultation Submission

AGWW-7Q2VGH

Name: helen leach

Submission Text:

You don't fool me with this Bill of 'Rights' rubbish. We in Australia already have many rights that other's don't have. Our national security has precedent over individual rights in this age of terrorism. In fact, individual rights should be accompanied by 'individual responsibility'.

Our Christian heritage is being eroded already.

What about the rights of the unborn. There are no genuine human rights when the right to life of the most vulnerable is not recognized by many, and with legalization of abortion in it's many barbaric forms and right up to birth, there is no protection by law at least for this group of humans who has no voice.

The experience in Canada of a Bill of Rights has been catastrophic for "real" rights.

DONT DO IT!
