

National Human Rights Consultation Submission

AGWW-7PNGTJ

Name: Roger Donkin

Submission Text:

The "other" is more about a query on the real need for these rights. It seems that folk get carried with the token following and persueing the task for the task or their jobs own sake.

I am not being disparaging here, just quering really what is really needful, and what is done by way of a directive regulation.

I am being brief here with 2 or 3 examples.

1. Detainese. were they really hurt? Ok that times were reduced etc. That's admin

2. "Aborigines" Where are they discriminated?

there position is mostly of their own choice. they have not wanted to be Europeans chasing things.

The real discrimination comes down to being in their homeland centres. This is and can change. Many popular notions come to decisions and motivation, and then help ... I have lived in Arnhemland and have many friends.

3. Children young people? are you as 'Human Rights' cutting out families? I know some have self destroyed themselves, but do you need a puffed up 'Right' to encourage and help and re unite, Some kids are straight rebels against any and all. I can leave that...

4. Our Constitution as you have said grants freedom of religion and freedom of residence.

This includes freedom of association.

This also includes freedom of speech. there is a safety for individuals with defamation laws.

Please write back and tell me if you are planning to add to that. The more you define the more you define the more you have to define, Silyness.

It is easy to see some things. the bigger the noise the more notice govts sometimes take.

There is also a saying I have noticed is that people doing the wrong thing that they inwardly know, the louder they demand society makes their wrong doing be right, Get on the surface "ok" Truth is such can be abborent, with most people not getting too close.

This last point is true. The pressure comes with lobby groups to redefine men and women and fasmilies. two men adopting a little girl. I just shudder. I am very interested to know what you all think of that. But I wonder if a true feeling would be given in these P correct times.

2nd LAST A small apology if the last para was negative and you felt I was biased or.... How else could I convey what is.

Last. I read through the Victorian human Rights thing. Basically a dangerous load of waffle.

To wrap up: What sort of weighing do you guys put wrt to ordinary people who don't get paid to employ professional Lobbyists? I Will try and be at the Caloundra meeting, and have enrolled for updates.

Thank You for reading this. Please make a real reply if you do, and not too much public servant format. I have been a member too.

Kind Regards. I trust your project goes smoothly.

Roger Donkin
