

National Human Rights Consultation Submission

AGWW-7SVG2C

Name: Bridget Gargan

Submission Text:

- 1) We don't need a bill of rights, our rights are adequately protected with our current system of checks and balances.
- 2) Bills of rights have done nothing to prevent major crimes against humanity in other countries that have them.
- 3) Where Western democracies have enacted such bills of rights, it has actually reduced or limited basic human rights e.g. freedom of religion, freedom of expression.
- 4) Bills of rights move power from the democratic and parliamentary processes into the hands of unelected judges and clog up our courts.
